

# Matte and Super Matte Panels by Gizir

Matte and Super Matte Panels are manufactured to meet internationally recognized quality standards and will suit any residential or commercial project where a ripple free, easy to maintain matte finish is desired.

# The best quality panels you can find worldwide

## MATTE

Have you ever touched an oil canvas? Have you run your fingers up the tree, enjoying its shadow? What have you felt? Let's relive this feelings with our Matte MDF panels.

Matte panels are manufactured by application of matte foil to the refined and calibrated MDF.

The smooth and textured surface design creates a warm, cozy ambience. In our color range, we strive to be as close to the natural look as possible. Matte colors are optically and haptically veneer like, in close association with stone or leather but with a price advantage.

Authenticity is our product's unique feature.

Applying these expressive and sensual surfaces will create impressive living spaces and furniture.

## Matte and Super Matte Panel Characteristics

Width x Length (mm) 1220 x 2800

Thickness (mm) 8/18

Surface PVC

Panel MDF, Chipboard

## SUPER MATTE

SuperMatte is the latest product release from Gizir, showing their end-less pursuit to offer products in line with newest trends in the market. It is processed using a state of the art PUR line in a clean room environment. It is laid up on a refined and calibrated MDF core to ensure a smooth surface.

The "soft touch" is silky smooth to the touch. It gives the material a warm and velvety feeling. The muted colors convey an unobtrusive and high-quality sense of space.

SuperMatte by Gizir offers a very durable panel at one of the best price points in the Matte finish arena.

## Why Matte?

- Excellent resistance to water and moisture
- Easy to clean
- Increased UV resistance
- Environmentally-friendly features
